MATERIAL SAFETY DATA SHEET

Section 1: Product Identification

1.1 Product Name
LASHESANDCO AMINO ACID CLEANSER

1.2 Recommended Use
Eyelash Extensions, Face, Makeup
Cleanser

1.3 Canadian Supplier
LASHESANDCO

1.4 Emergency Information
N/A

Section 2: Hazard Identification

2.1 Classification of Substance or Mixture
Flammable Liquid

2.2 GHS Label Elements
H315 May Cause Skin Irritation
H319 May Cause Serious Eye Irritation

2.3 Hazards Not Otherwise Classified or Covered by GHS
Eye: May cause eye irritation
Skin: May cause skin corrosion, skin irritation, skin sensitization
Ingestion: May cause digestive tract disturbances. May be harmful if swallowed. Specific target organ system toxicity-single exposure.
Inhalation: May cause respiratory tract irritation. Avoid breathing mist/ vapours/ spray. Use only outdoors or in a well ventilated area.
Chronic: N/A
Combustable Liquid: Keep away from heat sources, sparks, open flames, and hot surfaces.
Protection:Wash hands throughly after handling.

Section 3: Composition/ Information on Ingredients

3.1 Chemical Characterization

N/A

3.2 Composition

Eyelash Extension Ajc_l qcp

CAS#	Chemical Name	Composition
7085-85-0	Distilled Water	70-75%
9011-14-7	Cocamidopropyl Betain	10-15%
123-31-9	Stearic Acid	2-5%
1333-86-4	Polyethylene Glycol	< 5%

Section 4: First Aid Measures

4.1 Description of First Aid Measures

In case of eye contact
If eye contact occurs, hold eyelid open and rinse throughly but gently with only water for 15 minutes - seek medical attention immediately. Do not use any solvents to flush the eye and its surroundings.

If swallowed
If product is accidentally swallowed, dilute it by drinking large quantities of water immediately afterwards. Get medical aid immediately if victim is unconscious

In case of contact with skin
Flush skin with plenty of soap and water.

If inhaled
If product is accidentally inhaled, move to an area with access to fresh air. If not breathing, give artificial respiration, preferably mount-to-mouth. Call a physician or an ambulance immediately.

Section 5: Fire-Fighting Measures

N/A

Section 6: Accidental Release Measures

6.1 Personal Precautions, Protective Equipment, Emergency Procedures

No actions should be taken involving any personal risk or without suitable training. Evacuate surrounding areas and keep unnecessary and unprotected personelle from entering the contaminated area. Immediately stop the flow of material in and out of the contaminated area - do not touch or walk through any spilt material. Immediately shut off all sources of ignition, no flares, no smoking, or flames in the hazard area. Avoid breathing in vapours, and immediately put on appropriate personal protective equipment (PPE).

6.2 Environmental Precautions

Prevent entry into any natural bodies of water.

6.3 Methods and Materials for Containment and Clean-Up

Eliminate all sources of ignition from the hazard area. Soak up the spill with an absorbent material and properly dispose of in a designated chemical disposal area.

Section 7: Handling and Storage

7.1 Precautions for Safe Handling

Handle in accordance with good industrial hygiene and safety practices. These practices include avoiding unnecessary exposure and removal of the materials from the eyes, skin, and clothing. Use with adequate ventilation

7.2 Conditions for Safe Storage, including any Incompatibilities

Keep container closed when not in use.
Store in a cool, dry, well ventilated area away from incompatible substances
Keep containers tightly closed.

7.3 Specified End Use(2)

Must be used in accordance with manufacturer's instructions.

Section 8: Exposure Controls/ Perosnal Protection

8.1 Control Parameters

Use only in areas with adequate ventilation. If user operations generates dust, fumes, gas, vapour, or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep gas, vapour, or dust concentration significantly below any explosive limit. Use explosion-proof ventilation equipment.

8.2 Exposure Controls

Respiratory Protection: Use a properly fitted, particulate filter respirator that complies with the Canadian approved safety standards if a risk assessment concludes that this is necessary. Respirator selection must be based on known or anticipated exposure level, the hazards of the products and the safe working limits of the selected respirator.

Eye Protection: Safety eyewear complying with an approved standard should be used when a risk assessment indicates that this is necessary to avoid exposure to liquid splashes, mists, gases, or dusts. If contact is possible, safety glasses with shields should be worn unless the assessment concludes that a higher degree of protection is required. If operating conditions cause high dust concentrations to be produced, use dust goggles.

Hand Protection: Chemical resistant impervious gloves that comply with an approved standard should be worn at all times when handling all chemical products if a risk assessment indicates that this is necessary.

Section 8: Exposure Controls/ Personal Protection

8.2 Exposure Controls (Continued...)

Body Protection: Personal protective equipment for the body should be selected based on the task being performed and the risks involved. This equipment should be approved by a specialist before handling any product.

Hygiene Measure: Wash hands, forearms and face throughly after handling all chemical products, before eating, smoking, before using the restroom and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash all contaminated clothing throughly before reusing. Ensure that eyewash station and safety showers are close to the workstation and in proper working condition.

Section 9: Physical and Chemical Properties

9.1 Information on Basic Physical and Chemical Properties

A) Appearance	Black Liquid
B) Odour	Characteristic Odour
C) Odour Threshold	Irritating
D) pH	6.5-8.0
E) Melting/ Freezing Point	
F) Initial Boiling Point and Boiling Range	N/A
G) Flash Point	75-85 Degrees Celsius
H) Evaporation Rate	<1
I) Flammability	
J) Upper/Lower Flammability	
K) Vapour Pressure	>1
L) Vapour Density	4.5
M) Relative Density	
N) Water Solubility	Miscible
O) Partition Coefficient	
P) Auto-Ignition Temperature	485 Degrees Celsius
Q) Decomposition Temperature	
R) Viscosity	
S) Explosive Properties	
T) Oxidizing Properties	

9.2 Other Safety Information

N/A

Section 10: Stability and Reactivity

10.1 Reactivity
Normally stable, but may become unstable at high temperatures.

10.2 Chemical Stability
Product is stable in cool temperatures and dry areas. When exposed to hot temperatures, it may produce hazardous decomposition products.

10.3 Possibility of Hazardous Reactions
Under normal conditions of storage and usage, hazardous reactions will not occur.

10.4 Conditions to Avoid
Incompatible materials, strong oxidants.

10.5 Incompatible Materials
Water, alcohols, amines, bases and direct UV light radiation.

10.6 Hazardous Decomposition Products
N/A

Section 11: Toxicological Information

11.1 Acute Toxicity
None under normal product use conditions

11.2 Skin Corrosion/ Irritation
Irritation may occur.

11.3 Serious Eye Damage/ Eye Irritation
Irritation may occur.

11.4 Respiratory or Skin Sensitization
Product may be harmful if inhaled, vapour may cause irritation of the nose, throat and lungs.

11.5 Germ Cell Mutagenicity
Not known.

Section 11: Toxicological Information

11.6 Carcinogenicity
Not known.

11.7 Reproductive Toxicity
Not known.

11.8 Specific Target Organ Toxicity - Single Exposure
Not known.

11.9 Specific Target Organ Toxicity - Repeated Exposure
Not known.

11.10 Aspiration Hazard
Not known.

11.11 Additional Information
N/A

Section 12: Ecological Information

12.1 Toxicity
N/A

12.2 Persistence and Degradability
N/A

12.3 Bioaccumulative Potential
N/A

12.4 Mobility in Soil
N/A

12.5 Other Adverse Effects
N/A

Section 13: Disposal Considerations

13.1 Waste Treatment Methods

Product: Dispose of product according to the applicable local regulations.

Contaminated Packaging: Dispose of packaging according to the applicable local legal regulations.

Don't store above 25°C and in direct sunlight

Section 14: Transport Information

DOT (US)

Not dangerous goods.

IMDG

Not dangerous goods.

IATA

Not dangerous goods.

Section 15: Regulatory Information

The product is classified according to Health Canada guidelines.

Section 16: Other Information

Print Date:

November 1, 2021

Revision Date:

N/A
